

MASAKI KLEINKOPF | Frontend Software Engineer

Los Angeles, CA • masaki.kleinkopf@gmail.com • [Portfolio](#) • [Linkedin](#)

SUMMARY

Masaki is a driven, team-oriented, frontend focused developer seeking opportunities to work with modern technology that focuses on intuitive user experience and social impact. He has proven experience working with cross-functional teams, including designers, developers, and PMs to successfully build modern software. With a former background as a professional jazz musician and educator, Masaki is passionate about learning new skills and collaborating with others to explore new technologies.

SKILLS

Languages/Frameworks: JavaScript | React | Vue | Nuxt | CSS | SCSS | Shopify Storefront | Typescript | Sanity CMS | Next.js | Astro

Testing: Mocha | Chai | Cypress

Tech/Tools: Git | Github | CircleCI

WORK EXPERIENCE

BEAN.LA (WEB AGENCY) | WEB DEVELOPER

Mar 2023– Present

Tech Stack: Nuxt 3/Vue, TypeScript, SCSS, Node, Shopify Storefront

- **Salon94**
 - Integrated Shopify storefront product data into Sanity CMS, and built a headless Nuxt Shopify storefront enabling a flexible approach for integrating ecommerce into the client's website.
 - Used Pinia state management and Shopify Storefront API to track inventory, build shop carts and create a checkout link to drive sales for the client.
- **Live Nation Venues**
 - Created password protected file download UI flow, connecting frontend to Netlify serverless functions utilizing SendGrid, creating a lightweight solution to request and approval for tech pack file downloads.
 - Built responsive UI from ground-up, based on Figma designs for mobile, small and large tablet, and desktop sizes utilizing custom SCSS grid, flexbox, Embla Carousel.
- **Dublab**
 - Developed [Dublab](#) website, utilizing serverless functions to successfully migrate the radio schedule from WordPress to Google Calendar, simplifying schedule management for the client.
 - Built new UI features such as snap to scroll and active schedule date functionality using Intersection Observer Web API.

ATLANTA COMMUNITY FOOD BANK | FRONTEND DEVELOPER (CONTRACT)

Sep 2022– Present

Tech Stack: React, Typescript, CSS

- Build features and maintain [The Community Food Experience](#), an engaging interactive simulation aimed at shedding light on the challenges faced by individuals experiencing food insecurity.
- Collaborate with Food Bank administrators to make UI decisions that best educate users on the difficult reality of food insecurity, leading to increased fundraising.
